**Thank you** for purchasing the **GOgroove AirBand** wireless Bluetooth stereo headset. The wireless Bluetooth capability enables you to listen to music anytime without getting tangled up in the wires of a regular headset. The lightweight, flexible design and pivoting ear pads allow for optimum comfort so you can enjoy your favorite music at home or on-the-go. With no wires to hold you back, where will you listen to your music?

## Quick Start

Make sure the **AirBand** is charged. Turn on Bluetooth function of your MP3 player or smartphone. Press and hold the Power button on the **AirBand** for 5-7 seconds to enter pairing mode. The LED indicator will blink red and blue rapidly. On your MP3 player or smartphone, search for Bluetooth devices and select "GG-AIR". Then, connect with the headset and you're ready to start listening to music and making phone calls.

## What's in the Box

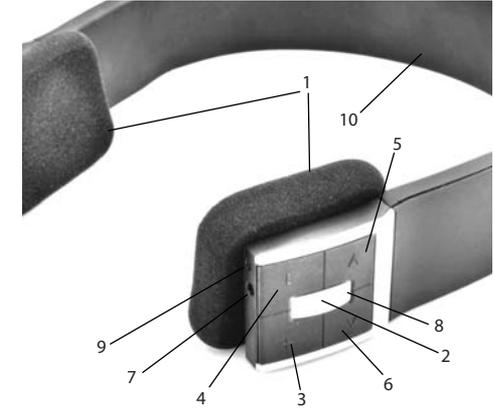

- a - AirBand wireless Bluetooth stereo headset
- b - USB charging cable
- c - AC power adapter

Replacement Ear Pads for GOgroove AirBand Wireless Bluetooth Stereo Headset available at <http://www.accessorypower.com/parts>

## Product Diagram

- 1 - Ear pads
- 2 - Power button
- 3 - Volume up (+)
- 4 - Volume down (-)
- 5 - Skip back
- 6 - Skip forward
- 7 - USB charging port
- 8 - LED indicator
- 9 - Microphone
- 10 - Adjustable headband

## Operating Instructions:

### Charging the AirBand

#### Charging by USB (Computer/Laptop)

Plug your (b) *USB charging cable* into the (7) *USB charging port* on the headset. Plug the other end of the (b) *USB charging cable* into the USB port on your computer. (8) *The LED indicator* on the **AirBand** will glow red when the device is charging.

#### Charging by AC Power Adapter

Plug your (b) *USB charging cable* into the (7) *USB charging port* on the headset. Plug the other end of the (b) *USB charging cable* into the (c) *AC power adapter*. Then, plug the (c) *AC power adapter* into an AC wall outlet. The (8) *LED indicator* on the **AirBand** will glow red when the device is charging.

## Switching the AirBand on/off

### Switching On

Press and hold the (2) Power button for 3-5 seconds. You will hear a beep and the (8) LED indicator will blink blue. This indicates that the device is powered on.

### Switching Off

Press and hold the (2) Power button for 3-5 seconds. You will hear a beep and the (8) LED indicator will blink red. This indicates that the device is powering off.

- The headset will switch off automatically in order to save power if no device is connected within 5 minutes.

## Pairing the AirBand with Bluetooth Devices

### How to enter Pairing Mode

**Make sure the headset is off.** Press and hold the (2) Power button for 5-7 seconds. Release when you see the (8) LED indicator alternate between red and blue.

### Pairing the headset with a Bluetooth smartphone

Keep the headset and smartphone within 1 meter when pairing. Enter pairing mode on the headset. Switch on the Bluetooth function of your smartphone and search for Bluetooth devices. After the phone completes its search, select "GG-AIR" in the Bluetooth device list. If prompted, type "0000" as the password or PIN number and press "Yes" or "Confirm". After successfully pairing, select "GG-AIR" in the Bluetooth device list and press "Connect". Once the headset is successfully paired and connected, the (8) LED indicator will blink blue twice every 4 seconds.

- Specific pairing procedures may vary with different smartphones. Please refer to your smartphone manual for further information.

## Reconnecting with Bluetooth Devices

**Connecting Automatically:** The headset will automatically connect with the last paired device when switching it on.

**Connecting Manually:** When the headset is in Standby Mode, press the (2) Power button and the headset will send a connecting request to the last paired device.

## Making a Call and Playing Music

### Button Functions

Button	Action	Function: Music Mode	Function: Call Mode
Power button	Press	Play / Pause music	End call
	Press twice	Redial last number	Mute / Unmute
	Press and hold for 2 seconds	Answer call / Reject call	Transfer call to phone
	Press and hold for 5 seconds	ON / OFF	ON / OFF
	Press and hold for 7 seconds from OFF	Enter pairing mode	
Volume (+)	Press	Increase Volume	Increase Volume
Volume (-)	Press	Decrease Volume	Decrease Volume
Skip back	Press	Previous Track	
Skip forward	Press	Next Track	

Not all smartphones support all of the functions listed above. Please refer to your smartphone User Manual.

## LED Indicator

*\*The (8) LED indicator glows blue or red and has different blinking patterns to indicate the action the headset is performing.*

### Charging

When charging, you'll see the (8) LED indicator illuminate red.  
When charging is complete, the (8) LED indicator will turn off.

### Pairing with Bluetooth Devices:

**Pairing Mode:** (8) LED indicator alternates between red and blue.

**Standby Mode** (Not connected with Bluetooth device): (8) LED indicator blinks blue twice every 2 seconds.

**Standby Mode** (Connected with the Bluetooth device): (8) LED indicator blinks blue twice every 4 seconds.

**Ringling:** (8) LED indicator blinks blue continuously.

**Conversation Mode:** (8) LED indicator blinks blue every 2 seconds.

**Low Power:** (8) LED indicator blinks red twice every 30 seconds.

## Indication Tone

*\*Your AirBand emits a beep or tone sound to indicate different device statuses.*

**Conversation Mode and Microphone Mute:** You'll hear 2 tones every 3 seconds.

**Low Power:** You'll hear 3 tones every 30 seconds

## Troubleshooting

### 1. The (8) LED indicator is glowing red

- Battery power is low and the device needs to be charged.

### 2. The (8) LED indicator isn't glowing when charging

- Please make sure the (b) USB charging cable is connected properly with the headset.
- If you haven't used the headset in a long time, the battery may be too low for the (8) LED indicator to light up. You'll need to charge the headset for 30 minutes, then you'll see the (8) LED indicator glow red.

### 3. The AirBand isn't pairing with my smartphone

- Is Bluetooth enabled on your smartphone? Did you successfully switch the **AirBand** to pairing mode?  
*\*You'll know the AirBand is in Pairing Mode when the (8) LED indicator flashes blue and red.*
- Try to pair the devices again. Please switch off headset and follow the instructions above (Please refer to "How to enter pairing mode" and "Pairing the headset with Bluetooth smartphone"). Make sure you push straight down on the button.

### 4. The music is playing out of the speaker on my phone instead of the headset

- For some smartphones, when they are playing music, the music will be transmitted through the speaker of the smartphone. You may have to choose "transmit the sound through Bluetooth" in the settings and select "GG-AIR" in the device list. The music will then be transmitted through the headset.

#### **5. I'm trying to make a phone call, but can't hear the other person's voice**

- Please make sure the headset has been switched on.
- Make sure the volume is not too low or muted.
- Make sure that the headset is properly connected to the Bluetooth device.
- Make sure the distance between the headset and the smartphone is in the working range.

#### **6. During a phone call, the other person's voice is not clear**

- Make sure that you have a good signal on your smartphone.
- Make sure the headset is in the available range of this product.

### **Cautions**

- Keep in a safe place free from dust, liquid, and extreme temperatures.
- Do not attempt to take apart the product.
- Try to avoid dropping on the floor or hitting against hard surfaces.
- Do not use chemicals to clean the product.
- Keep out of the reach of small children.

### **Product Specifications**
